○ **Message**

My study journey would never be completed without the endless support and guidance from Professor Akihiro TOKAI; to whom I express my sincere gratitude during the past 4 years. I had the opportunity to learn deeply from him the concept of "Environmental Engineering" and new efficient approach to study and handle my extra scholar life. It was my first time to experience the Lad learning approach at the Tokai Laboratory. This enables me to appreciate the quantity and quality of knowledge within the Tokai Laboratory. It was very helpful for my research and my knowledge in general in "Environmental Management". I definitely enjoyed all the discussions in the Lab, Cafeteria, Gymnasium, Library, and other places in the University I had with all the Lab members in their various topics, which gives me an understanding of their researches and valuable insight for my research. I would like deeply to thank all and every member of the Tokai Laboratory, such as the students, staff especially Dr. Kojima, Dr. Hoa for their personal contribution through piece of advice, encouragement, warmness, kindness, motivation.

Thus, making Tokai Laboratory as conducive and highly motivational learning environment.
