

Ibnu Susant (Indonesia)

Doctoral dissertation title:

Environmental Evaluation of Agro-Product Supply Chain:
Indonesian Palm Oil and Japanese Green Tea Case Studies

Main paper published during his career with our lab:

- Ibnu Susanto Joyosemito, Tokai Akihiro: System Dynamics Model Development for Evaluation of the Moratorium Policy on New Forest and Peatland Concessions under Bilateral Cooperation in Indonesia: Palm Oil Industry Sector Case Study, *Journal of Sustainable Energy and Environment*, Vol.5, Iss.1, pp.1-12, 2014.
- Ibnu Susanto Joyosemito, Tokai Akihiro: A Modeling Approach to Study the Pesticide Dynamics to Reduce Pesticide Residues in Japanese Green Tea, *Journal of Engineering in Agriculture, Environment and Food*, Vol.9, Iss.4, pp.311-323, 2016.

Working place after graduation:

Osaka University (in 2016)

His message:

It's a blessing when Prof. Tokai accepted me as his student in this lab. I greatly enjoyed my extraordinary journey in Tokai lab. My knowledge on the environmental issues has improved a lot. I have applied the slogan "No Risk No Life" both in the research and my daily life. I have learned many things in Tokai lab. It was not only about struggle during the study, but also friendship. "Yoku manabi yoku asobe" is the way how I balanced my study life in Tokai Lab., this motto has become the consensus among us, members of Tokai lab. Honestly, I lost my word to express my gratitude to Professor Akihiro TOKAI, a great teacher who always gives his invaluable support to his students. For me, he is like the extension of God's hand.
