

Thai Van Nam (Vietnam)

Doctoral dissertation title:

Establishing an eco-labeling scheme for industrial product categories in developing countries:
A case study of Vietnam

Main paper published during his career with our lab:

- V.N. Thai, T. Morioka, A. Tokai, Y. Yamamoto, and T. Matsui: Selection of product categories for a national eco-labelling scheme in developing countries: a case study of Vietnamese manufacturing sub-sectors, *Journal of Cleaner Production*, Vol.18, Iss.14, pp.1446-1457, 2010.
- V.N. Thai, A. Tokai, Y. Yamamoto, D.T. Nguyen: Eco-Labeling Criteria for Textile Products with the Support of Textile Flows: A Case Study of the Vietnamese Textile Industry, *Journal of Sustainable Energy & Environment*, Vol.2, Iss.3, pp.105-115, 2011.

Working place after graduation:

Ho Chi Minh City University of Technology

His message:

I must gratefully acknowledge the help of Professor Akihiro TOKAI for “holding my hand” until the end. For his invaluable supervisions, clear logic, critical thinking and questioning, for the smallest details, and most of all, for his emotional supports. Without such critical and detailed comments on defining research problems, ways to thinking and writing, my PhD course would have never been finished.

The TOKAI Lab is my true home, it taught me all the basis of environmental management regarding technical aspects, and later allowed me great flexibility to explore my own pathways. Send my best wishes to all lab members here for all assistance, every discussion, every piece of advice, and every cup of coffee.
